Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1887 Excerpt: .are four distinctive systems of immediate supervision over the men, with which the custom of drawing and setting timber is more or less interwoven. 1. The whole pit, if small, and each seam or large district in an extensive colliery, is let to a set of butties, usually by the ton. The butties generally sublet each drift or other working place to two or three colliers, who either employ a loader only, as in the Lancashire method of working; or several hands, as in the third system, which is usual in the longwall method of working. The butties, or men in their pay, perform the duties of firemen; they are expected, not only to look to the forwarding of a large output, in which they are immediately interested, but also to look to the safety of the men. At some collieries a few main air road...

Reviews

This ebook is definitely not simple to begin on reading but really enjoyable to read through. This really is for all who statte that there had not been a worth reading. You may like how the author publish this ebook.
