Excerpt: . . . eye, the letters form their images alternately on sensitive and insensitive parts of the retina, and thus come and disappear, sometimes with change of form, and in accord with the irregular displacement of the percipient elements (Bonders). Mr. B. A. , a tutor, myopic from childhood, on getting out of bed one morning, found to his horror that he had suddenly lost the sight of the right eye. A peculiar dense cloud appeared before every object, and he saw only a small portion of the window. It first occurred to him that his blindness must be due to cataract. The peculiar character of the obscuration of vision at this moment is represented at B, Jig. 20. Upon suddenly closing both eyes, a number of spots darker than any cloud appeared to fall over the pupil. In a strong light he was able to discern...
