Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English Brand New Book ***** Print on Demand *****.Excerpt from Memorial Lectures Delivered Before the Chemical Society, Vol. 2: 1901 1913 The Chemical Society has recently become only too familiar with the death of foreign members of patriarchal age, otherwise it would be difficult to realise that a chemist whose death took place last year was the friend and associate of Berzelius. The man whose life and work we commemorate to-day was an almost exact contemporary of another famous chemist whose great genius and high character have been recently depicted for us by his friend and fellow-worker. Rammelsberg was born two years later than Bunsen and outlived him by less than one year. Among the workers who during this period contributed to raise the edifice of modern chemistry upon the foundations laid during the childhood of these two men, some, like Bunsen, were thinkers of the highest genius whose inspiring ideas directed the development of the structure, others, like Rammelsberg, were the skilful and indefatigable craftsmen who amassed and set in order the material. Owing to the fact that Rammelsberg's name is not associated with any of the great discoveries of a period which belongs mainly to organic chemistry, and that he purposely confined his life-work to inorganic research, there is some danger lest the value of his contributions to science should be underrated, except, indeed, among mineralogists; I am, therefore, particularly glad to have this opportunity of sketching a brief record, however imperfect, of his colossal labours. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work,...
